Morgan, Tyler

Hello, I have looked over your cover letter and resume. Would you be available for an interview at 2:00 on Friday March 15th?

Subject: Junior Developer for hire

Dear Logan Danner,

I am writing to express my interest in the Junior Developer Internship position at IRL Tech. Upon discovering your company, I was immediately drawn to your innovative approach to technology solutions.

While my professional experience is limited, I am enthusiastic about the opportunity to contribute to your team. I have been teaching myself JavaScript, CSS, and HTML in my free time, and I am eager to apply these skills in a practical setting. Despite being a high school student, I have a genuine passion for technology and a desire to learn and grow.

I have some experience working on projects with my peers, which has taught me the importance of communication and collaboration. I believe these skills will be valuable in supporting the IRL Tech team.

What excites me about IRL Tech is your commitment to developing cutting-edge technology solutions that positively impact people's lives. I am inspired by your dedication to pushing the boundaries of what

is possible in the tech industry.

I would love the opportunity to discuss how I can contribute to the IRL Tech team further. Please feel free to contact me at Amber25503@live.ytech.edu to schedule an interview. Thank you for considering my application. I am eager to potentially join your team and contribute to the success of IRL Tech.

Sincerely,

Amber Unger
